ASLE 1984
COMBINED SUBJECT AND AUTHOR INDEX

Each paper published during the indexed period is assigned a sequence number, the first two digits of which indicate the year in which the paper was published. The index may be entered either through the Subject Listing or the Author Listing. The former comprises an alphabetical list of primary keywords, perhaps with associated secondary keywords, together with sequence numbers of papers of which the keywords are descriptive. The latter comprises an alphabetical listing of all authors of indexed papers, together with corresponding sequence numbers. Having determined the sequence numbers associated with a given subject or author, the papers to which these numbers refer may be found in the Chronological Listing. This Listing provides a complete reference for all papers published in *Lubrication Engineering* (L), *ASLE Transactions* (T) and *Special Publications* (SP). The papers are listed by Authors(s), Title, Publication, Volume Number (bold type), Issue Number, and Page Numbers and are in order of ascending sequence number.

An excellent source of general information in the field of lubrication is the *Handbook of Lubrication*, edited by E. R. Booser and published by CRC Press under the sponsorship of ASLE.
